

Beavertail Cactus

Opuntia basilaris

Red Buckwheat

Eriogonum grande rubescens

Cacti and Succulents in the Garden

Come join us

in

The Kids' Adventure Garden

Conejo Valley Botanic Garden

Saturday, June 5, 2010 from 10 a.m. to 12 p.m.

Our June Talk in the Garden will be on "Cacti and Succulents in the Garden" presented by Steve Pietrolungo and Chris Mankey. Steve has been a California Certified Nurseryman since he was 16 years old and earned his Masters of Agriculture Science degree from Cal Poly SLO. He has taught horticulture and agriculture for 19 years.

Chris Mankey has been a teacher for 18 years with a focus on biology, anatomy, physiology and plant science. Both Steve and Chris have years of experience in propagating and growing cacti, aloes, cycads and succulents. They will be able to answer many of your questions on how to incorporate these wonderful plants into your home garden.

There will also be a hands on lab for those who want to pot up their own starts. So come on by and enjoy another great morning in the Garden.

If you have questions about our "Talk in the Garden" program or need directions, please visit www.conejogarden.org or e-mail Tom1374@verizon.net.
